Office Action Summary	Application No. 10/664,365	Applicant(s) CRUE, DEAN	
	Examiner Peter R. Brown	Art Unit 3636	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 01 December 2005.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.

Claims 5-7 and 11-13 have been withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made without traverse in the reply filed on December 1, 2005.

Claims 1-4,8-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, the “cut-out portion” has not been sufficiently defined, neither in its location relative to the seat and the other elements, nor its function in terms of interacting with the legs of a second stacking stool. In other words, the claim does not specifically set forth where the cut-out is located, and how does it cooperate with another chair to limit movement.

Claim 2 is also indefinite in that the bracing system has not been sufficiently located nor defined in structural terms, nor does the claim set forth how movement is limited.

Claim 3 fails to sufficiently define the “footrest”, nor the function and purpose of the “bend”. While claim 4 provides some of the function of the “bend”, the claim should specify that the bend encompasses the leg of the other stool *when the stools are in a stacked orientation*.

The same objections apply to claims 8-10.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-4 and 8-10, so far as definite, are rejected under 35 U.S.C. 102(e) as being anticipated by Bruschi et al.

Figures 1-5 show structure as claimed, including a stacking "stool", wherein the seat has cut-outs 10a for engaging the leg of another chair, and which includes a leg bracing system wherein a "bend" 13 in a foot member engages a part of a leg support 11b of another chair to limit movement therebetween.

Note that absent defining structure in the applicant's claims, the examiner is free to define the "footrest", "bend" and "leg bracing system" in the broadest possible sense.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Cohen, Nash, Newman, Bliss and Rowland show various leg bracing systems, while Guichon, Smith and Grandclement show seats with cut-outs.
